DETAILED ACTION

Claims 1-7 are pending after the preliminary amendment of 11/25/03

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishida et al (US 5,451,317).

bubbling air, capable of continuous process, sediment removal from the bottom, all as claimed – see figures, particularly, figure 1, abstract, and column 2 lines 16-60.

2. Claims 1-3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Cote et al (US 5,607,593).

Cote teaches a submerged filter in a treatment tank with microporous membranes attached to plurality of filter supports, raw fluid inlet, filtrate removal, bubbling air, capable of continuous process, sediment removal from the bottom, all as claimed – see figures and abstract. Membranes are made of PVDF or PTFE – resin material (column 4 liners 48-55)
